Progetto Rossi

Rubinetteria Rossi Fiorenzo

Our company is a small family owned company established in 1949. Ever since 1949, we have been driven by one idea : do better tomorrow. This does not mean tomorrow we will have necessary to be different from today, alone a valid reason justify innovation. Everything must have a reason to be inside or outside our product every detail must have a purpose or be born out of direct experience and every single function must be supported by a precise intention

S t r i p e s

An unexpected design pure geometric forms spout and control lever integrated make this product unique

P a s s i o n F o r L a v
An enduring passion for
Fabric, Innovation and
Quality since 1949 are the
very essence of this special
line of products for Lav.

Passion For Lav

M o d u l o

New ergonomic shapes and a new construction philosophy allow us to supply the right product at the right price point .

Modulo

EUROPA is the first complete range of coaxial thermostatic mixer, with a cute and unsuspected design, the use of a thermostat rather than a static mixing valve provides increased safety against scalding, and increased user comfort because the hot-water temperature remains constants. Too hot, too cold, too hot, too cold, what the hell!?! No more scalding hot and freezing cold with Europa thermostatic mixers. Floor mounted mixers for lav and for bath and floor or wall mounted shower column are designed to give you the best possible start to each day. The range is also completed by a wash basin version with cycling cartridge, which could also be equipped with our LightTap system. "LightTap" is a smart and nice idea , the ring became red-violet-blue depending on water temperature flow, so the operator can immediately know the temperature level as visual control is immediate

Europa

“ Decadence ” reflect the structure of Art Deco based on mathematical geometric shapes updated on a modern twist. Single hole mixers and 3 holes sets mix and match creating a wide and complete range.

Decadence

Contemporary styling and perfect geometry in its clean and simple design. The original wing shape control lever give to the product a unique light design. In water flow version, water flows naturally as it falling from a mountain stream water fall

Geometrica

Pure forms stirs the senses. P.Line is a complete range of mixers, 3-holes sets, plate mounted modules, with which anyone can create a personal room for their individual taste

P.Line

MimoThermo is a complete wide range of plate mounted thermostatic modules for bath and shower could match with all our ranges. The use of a thermostat rather than a static mixing valve provides increased safety against scalding, and increased user comfort because the hot-water temperature remains constants. Too hot, too cold, too hot, too cold, what the hell!?! No more scalding hot and freezing cold ! Also “TecnoBox” make easy and fast the installation and grant an accurate and perfect work To take under consideration the faucet could be always removed for changes or maintenance avoiding problems of a built-inn installations. Longevity is a rare quality, we offer design solutions that endure the test of time.

MimoThermo

" Totem " A strong unique and quintessential design , a stunning presence on the bathroom through a blend of power and elegance, functionality and efficiency.

Totem

About "Inglese " it is possible to talk about a classic product injected by a bit of nostalgia into the forms. The range also show attention to ergonomics, multifunctionality and ease of care

Inglese

Progetto Custom

We believe in the design integration that's why through 60 years of experience we have devised a new technical department which can combine ideas, standards, design, concepts to build "Custom" items, for who like to own a unique and solo object following the shape suggested by the bathroom designer even in one piece only. From sketch to final product we can follow step by step each momentum of creation to create the original, unique and lasting.

Kitchenology

EWS DoubleJet FlowPilot LightTap
Pull Out Spray, TecnoLever, T42

These are the most enhanced features of our kitchen faucets. Attention to details, ergonomics, multifunctionality, carefully controlled manufacturing ensure your product will endure the test of time. EWS is a new way to open and mix the water through electronic components which move standard valves. What the electronic control can do better than a manual? In design field the control can be a flat and very thin part which can be placed near the spout or around the sink, that means free design and less impact on the style. The control panel allow an easy use of the faucet, pre-setted positions can drive you immediately to the quantity and temperature you need. The display show the water temperature by colouring a ring red/blue avoiding burns. DoubleJet Pressing the spout head button alternates the water flow between normal jet and spray functions. The sprayhead features easy to clean silicone nozzles to ensure easy cleaning. FlowPilot allow flow micro regulations to always have the desired quantity. Once selected the temperature on the Cycling cartridge is possible to close and open only operating with FlowPilot. Some models could be equipped with LightTap system, "LightTap" is a smart and nice idea, the ring became red-violet-blue depending on mixed water temperature flow, so the operator can immediately know the temperature level as visual control is immediate. PullOutSpray to easily reach the desired point. Some Items can be supplied with TecnoLever cool design which grant a precise control and a professional use. T42 is a boiling water and chilled filtered water dispenser to make Coffee Tea Hot beverages instantly.

Classic Design

Product with a classical and reassuring design, traditional style and technically advanced engineering to dress every kind of bathroom with elegance

A photograph of a waterfall cascading over dark, layered rock formations. The water is captured in motion, creating a soft, blurred effect as it falls. The rocks are dark and textured, with some green moss or lichen visible. The overall scene is natural and serene.

EWS is a new way to open and mix the water through electronic components which move standard valves. Why to follow this way? Electronics components are parts of our life, every days we normally use phones, personal computers, various electronics products

What the electronic control can do better than a manual? In design field the control can be a flat and very thin part which can be placed near the spout or around the sink, that means free design and less impact on the style. The control panel allow an easy use of the faucet, pre-setted positions can drive you immediately to the quantity and temperature you need yes, simply selecting one position you will have the quantity and temperature you need without energy or water wastes, even in case of pressure changing in hot or cold water the system react and keep same levels, .

About security features, the faucet close in case of cold water loss , it work for a sufficient time in case of total energy lack , the display show the water temperature by colouring a ring red/blue avoiding burns.

Electronic Water System

To look ahead

We are always, looking at new models which are inspired by and reflect styles and trends of modern design. Follow a brief selection of new shapes and materials we are working on, some of them are ready to sell immediately
